**You are about to purchase a product that is not simple and may be difficult to understand.**

What is this product?	
<b>Type</b>	This product is a tracker exchange traded product. The product replicates the price movement of the underlying (BTC) in CHF terms, while mitigating the USD/CHF currency risk via a rule-based hedging strategy on FX forward contracts (the “FX hedge”). The currency hedge of this product is not perfect – it aims to reduce the effects of USD/CHF movements but cannot eliminate them entirely, adjusted by the applicable Investor Fee.
<b>Term</b>	This product is not subject to any fixed term.
<b>Objectives</b>	The product provides the opportunity to participate in the underlying’s performance in a transparent way and with a single transaction. The securities are only issued directly to authorized participants (who are generally regulated financial institutions) in return for delivery of the underlying asset(s) which must be newly minted or sourced from a defined list of crypto currency exchanges. All assets relating to the securities are secured by way of a pledge to a collateral agent for the benefit of the investors. Retail investors are expected to purchase and sell securities in the secondary markets on normal stock exchanges. You may also request a redemption of the securities from the issuer on any business day on or after the issue date, subject to 35 calendar days notice on the last trading day of the month, being the dates on which you may exercise its right to redeem the securities.
<b>Intended retail investor</b>	This product is a complex product and is only intended for informed retail investors who (i) can bear loss of capital, are not seeking to preserve capital and who are not looking for a capital guarantee; (ii) have specific knowledge of and experience investing in similar products and in financial markets; (iii) seek a product offering exposure to the underlying asset(s) and have an investment horizon in line with the recommended holding period stated below; and (iv) are aware that the value of the product can change significantly due to the volatile underlying asset and, as a result, have sufficient time to actively monitor and manage the investment.

## What are the risks and what could I get in return?

**!** The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

This rates the potential losses from future performance at a very high level, and poor market conditions are very likely to impact our capacity to pay you.

Be aware of currency risk. If you buy and trade this product in a currency other than USD, the final return you get depend on the exchange rate between that currency and USD at that time. This risk is not considered in the indicator shown above.

Material risks not included in the summary risk indicator are: lack of consensus on the legal status and regulation of crypto assets and risks associated with nascent technology and crypto protocols.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, and the amounts payable to you after realization of the collateral are insufficient, you could lose your entire investment.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavorable, moderate, and favorable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

### Recommended holding period: 01 Year

Investment: 10,000 CHF

Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		01 Year (recommended holding period)
<b>Stress scenario</b>	What you might get back after costs	CHF 1,360
	Percentage return	-86%
<b>Unfavorable scenario</b>	What you might get back after costs	CHF 2,450
	Percentage return	-75%
<b>Moderate scenario</b>	What you might get back after costs	CHF 15,080
	Percentage return	51%
<b>Favorable scenario</b>	What you might get back after costs	CHF 150,500
	Percentage return	1,405%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor and any on exchange bid/offer spreads. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 01/2013 and 11/2023.

Moderate: This type of scenario occurred for an investment between 01/2013 and 11/2023.

Favourable: This type of scenario occurred for an investment between 01/2013 and 11/2023.

### What happens if SA1 is unable to payout?

The Issuer is a special purpose vehicle. In the case of default by the Issuer the assets it holds as collateral may be realized in order to meet its obligations to investor and the cash proceeds of this will be paid out in the order of priority of payments applicable to the product. These proceeds may not be sufficient to meet all obligations and make all payments due in respect of the securities. In these circumstances you may not be able to realize the full value of your securities and suffer a loss on your investment. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss. The investor is exposed to the risk of default of the Issuer, which is only mitigated due to collateralization.

### What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The total costs take into account one-off, recurring fees and incidental costs. The amounts shown here are the cumulative costs of the product itself for the recommended holding period.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product.

Table 1: Costs Over Time

<b>Exit costs</b>	0.00% of your investment before it is paid out to you. We do not charge an exit fee for this product, but the person selling you the product may do so*.	CHF 0
<b>Ongoing costs</b>		
<b>Management fees and other administrative or operating costs</b>	1.50% of the value of your investment per year. This is an estimate based on actual costs over the last year.	CHF 223
<b>Transaction costs</b>	0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell	CHF 0
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	There is no performance fee for this product	CHF 0

Please note that past performance is not indicative of future performance. It cannot provide a guarantee of the returns that you will receive in the future. Past performance shows the product's performance as the percentage loss or gain per year over the last year.

### How long should I hold it and can I take my money out early?

Recommended holding period: 01 year

However, as the underlying(s) is/are very volatile, investors should monitor the value of the product constantly as sudden changes in value will be frequent and abrupt. Retail investors are able to sell the product on exchange other than in cases of unusual market activity or in case of technical disruptions.
