Authorised, issued and unpaid: 100 shares of US\$1 each	100	100

7. Financial Instruments

All assets and liabilities of the company consist of financial instruments, with the exception of accrued income and accrued expense, these instruments are stated at Fair Value with any movements being posted through profit or loss.

8. Financial Risk Management

The Company is exposed to financial risk through its financial assets and financial liabilities. The most important elements of this financial risk are foreign exchange risk, credit risk, interest rate risk and liquidity risk.

8(a). Foreign Exchange risk

The Company is exposed to foreign exchange risk arising from various currency exposures, primarily to Swiss Francs ("CHF"). Foreign exchange risk arises from future transactions and reorganised assets and liabilities. The most significant risk is the Bitcoin tracker denominated in CHF totalling CHF 14,219,116 (2023: CHF 10,572,132) and the cash assets held in Swiss Francs as at 31 December 2024 USD 4,308.39 worth of CHF were held as a cash overdraft (2023: CHF 8.96). Further the Company holds cash assets in Euros ("EUR") totalling EUR 215,199 (2023: EUR nil).

Any change as a result of exchange rate movement would be passed onto note holders and therefore the Company's exposure to risk is minimal.

8(b). Credit Risk

Credit risk is defined as the risk that a counterparty will be unable to pay amounts in full when due. The Company's exposure to credit risk primarily relates to the possibility of financial loss due to default of the Cryptocurrencies. Amina Bank AG (Formerly Seba Bank AG), Zug, Switzerland is the custodian for the assets, and is an A rated credit institution. The underlying assets themselves however, are highly volatile and present a significant risk. Any change in value of the Cryptocurrencies is borne by the Noteholders who ultimate take on this risk.

8(c). Interest rate risk

The Company Incurs only a small amount of interest on its cash holdings, and therefore this does not present a significant risk to the Company. As with other items the interest income or expense is passed onto the Noteholder.

8(d). Liquidity risk

The Company's libalilities are connected to the Company's assets. Any payment to the note holders would be satisfied by selling sufficient assets to meet the obligations. The cryptocurrencies held are traded in an active market and can be sold instantly. Therefore the liquidity risk is minimal.

9. Ultimate Controlling party and Related Party Transactions
